REASONS FOR ALLOWANCE

1. The following is an Examiner's statement of reasons for allowance:

the allowability resides in the overall structure of the device as recited in independent claims 1, 16, and 23, and at least in part because claims as amended recite: "a deflecting element exerts a counter force counteracting a curve of the actuator element only in the operating state in which the switching function of the switching device is not triggered".

This is clearly not the case in connection with the bimetal plate (8) of the Takeda patent (the primary reference used in the outstanding rejection), wherein central support element (5) always exerts pressure on the plate (8).

Therefore, in view of the above, the Examiner believes that the aforementioned limitations in combination with remaining limitations of said independent claims 1, 16, and 23, are to render said independent claims and subsequently all of the dependent claims patentable over the art of record.

None of the cited references either taken alone or in combination is believed to render the present invention unpatentable as claimed.

2. Any comments considered necessary by Applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
